What devices are eligible for device protection?

Almost everything. Smartphones, feature phones, BYODs, tablets, wearables, hotspots, routers and modems are all eligible.

Device Tier	Protection<360> Monthly Cost
1	\$7
2	\$9
3	\$13
4	\$16
5 and BYOD	\$18
6	\$25

What's the monthly cost?

The cost plus tax, if applicable, is determined by device tier and plan, and will be separately itemized on your bill. Please see a T-Mobile sales associate or visit mytmclaim.com to find your device tier. If you switch your device to one that's classified in another tier, and as device depreciation adjustments are made, the monthly charge for your new tier will be reflected on your T-Mobile bill.

There's a basic Device Protection⁴ option available with coverage that only includes accidental damage, loss, theft and hardware service protection (excluding broken screen protector replacement), and none of the Additional Services listed (including AppleCare Services). You'll also pay a higher accidental damage deductible if you have a device that's in Tier 4 or higher.

How do I enroll?

You may enroll while making a qualified T-Mobile device activation, purchase, lease or finance. If you'd like to enroll afterward, or if you're bringing your own device, it must be within 30 days of your transaction and the device will need to pass a Visual Mechanical Inspection in a T-Mobile store. Enrollment is optional, may be canceled at any time, and isn't required to activate, purchase or finance the device or obtain T-Mobile wireless services.

Please remember to send or receive a call, send a text, or access data on the device (not using Wi-Fi) to verify that your device is active on the T-Mobile network.

¹ This applies when and where repair service is available; otherwise, we'll provide a replacement device and collect the appropriate service fee/deductible based on device tier for all other accidental damage.

² Download and register the Protection<360>® app by Assurant® to have full access to features. Availability and features may vary by device and operating system.
